Handybar™

**Personal
support
handle for you
and your vehicle**

The Handybar facilitates getting in and out of the car for those with physical issues such as arthritis by providing solid support and leverage. It features a quick and easy locking system by using the existing door striker on both driver and passenger doors.

Handybar®

**BEST NEW PRODUCT
WINNER**

Help yourself or someone else ...

Who uses the Handybar™

- People with physical challenges
- People recovering from surgery
- People with back or leg problems
- Expectant mothers
- People with vehicles low to the ground
- People with trucks and SUV's

How does it work?

**3 Easy Steps for Freedom
to get in and out of your car.**

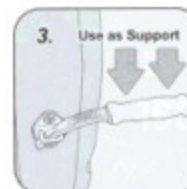

1. Insert Handybar™

Insert the Handybar™ into your existing door striker, located on the door frame of your vehicle.

2. Rotate to lock

The Handybar™ will find its own locked position and is now ready to use.

3. Use as Support

Now you are free to get in and out of your vehicle safely and comfortably every time.
