

Joint Pain

Baby Boomers are getting older, and effective pain treatment is becoming more important all the time -- no coincidence there.

Just take a quick look around at your doctor's office. Chances are pretty good you'll find a pain chart designed to help patients rate their pain on a scale of 1 to 10. Experts say this is part of a movement toward recognizing and treating a patient's pain more aggressively.

A large portion of our population, the Baby Boomer generation, has moved into the years where chronic pain from arthritis and back pain is very common.

Living with pain is not good for people. It influences all aspects of life: mood, concentration, motor performance, sleep, and social relations. New evidence indicates that pain negatively affects the immune system, so much so that cancer cells appear to grow faster when there is pain. Being stoic and putting up with severe pain is not good for patients.

Pain is your body's warning system, alerting you that something is wrong. This occurs whenever actual or potential damage can occur.

The word arthritis means joint inflammation, but is often used to refer to a group of over 100 diseases that cause pain, stiffness, and swelling in the joints. These diseases also affect other parts of your body, including important supporting structures such as muscles, bones, tendons, and ligaments, as well as some internal organs.

MOBILITY

Formula that's Easy to Take!

*Soluble & Bioavailable
Organic Formula*

Easy Mobility is highly absorbable and bioavailable, without causing digestive difficulties

Why Easy Mobility? It's Simply the Most Soluble and Bioavailable Joint product.

Relief + Repair = Mobility

Easy Mobility is the first bioavailable complex of clinically proven natural, active compounds that prolong health, vitality and strength of joints, bones, cartilage and skin.

Our exclusive formula is the culmination of decades in the field of pain research. Easy Mobility's Calcium FructoBorate, Type II Chicken Collagen, Wild Blueberry Extract and Fiberrific provide the body with nutrients proven to relieve pain, slow the progress of tissue damage and actually begin to reverse existing tissue damage.

Easy Mobility is gentle on the stomach, making it easier to take, especially for children and the elderly. Our exclusive formula is the strongest available, surpassing Glucosamine, Chondroitin and Methylsulfonylmethane (MSM) alone or in any combination. Since Easy Mobility is highly concentrated, there is no need to take multiple "horse pills" to get an effective dose. With just ½ teaspoon or less, twice daily, you will get all the relief and protection you need.

Easy Mobility is the most effective joint formula available today. It promotes healthy joint function, relieves pain and inflammation while repairing the damage associated with age, arthritic conditions or sports injuries.

The Easy Solution

Most supplements are in tablet form. These tablets first need to be broken down by your body before their nutrients become available for absorption. Unfortunately, the binders and coatings used to hold tablets together and help them keep their shape also make the tablet difficult for your body to break down. Thus, your body cannot easily get to the nutrients in tablets. As well, tablets usually use forms of nutrients that are not well absorbed by your body and are potentially harmful.

Easy Mobility, on the other hand, is a soluble powder. Your body does not need to break it down to release the active ingredients. They are right there for your body to pick out and absorb through the gastric mucous lining, providing your body with a much larger surface area to volume ratio for easy absorption.

Easy Mobility uses the most soluble and bioavailable forms of clinically proven nutrients. These nutrients are completely natural, have undergone rigorous clinical testing to assure they are effective, highly absorbable, stable against salt, pH and oxidation, and mild on the gastrointestinal system.

Easy Mobility is ideal as a supplement for children, teens, adults and the elderly. Easy Mobility's high bioavailability and gentle digestive action allow everyone to safely and easily get the nutrients they need to keep them mobile.

Questions and Answers

Why is Easy Mobility better ?

With other joint supplements you are forced to take a lot of pills which are difficult to digest, poorly absorbed and can cause digestive problems. Easy Mobility is virtually tasteless, odourless and can be mixed in any non-carbonated drink or food without changing its taste. Easy Mobility is highly absorbable and bioavailable, without causing digestive difficulties.

How do I take Easy Mobility?

Easy Mobility can be mixed in any non-carbonated drink (hot or cold). For best results, blend into water, juices, milk, tea, coffee or any other beverage and enjoy.

When do I take Easy Mobility?

You can achieve optimal absorption by taking Easy Mobility twice daily with meals.

Are there any allergens in Easy Mobility?

Easy Mobility contains no gluten, yeast, corn, wheat, sugar, salt, soy, starch, dairy, citrus, preservatives, colours or flavours..

What should I expect to feel when I start taking Easy Mobility?

Within a couple of weeks you should notice that stiffness and joint pain has been reduced. As you keep using Easy Mobility you should notice greater range of motion and further reduction in joint and back pain.

Easy to Take. Easy to Absorb, Easy to Enjoy!
